

MTC Monthly Distribution Rules

- All owners of MTC that would like to participate on the airdrop **MUST REGISTER** their Ethereum (ETH) address or addresses where they keep their MTC on the web page that has been created for this purpose. The web page can be found on the following URL: <https://mtc.docademic.com/register.html>.
- ETH Address registration needs to be done only once per address.
- All REGISTERED addresses that has MTC positive balance by the last day of each month at 18:00:00 GMT will be **ELIGIBLE** to receive the monthly airdrop.
- The airdrop will only work on addresses for which the holder is in possession of the address private key. **Exchange addresses or smart contract addresses** are **NOT ELEGIBLE** for airdrop.
- A snapshot of the MTC addresses balances will be taken on the last day of each month at 18:00:00 GMT.
- The monthly airdrop amount will be distributed proportionally between all **ELIGIBLE** addresses.
- An ETH address will be assigned a "HOLDr" account status for a month if between the snapshots taken, there are **NO** MTC "OUT" transactions.
- ETH addresses with a "HOLDr" account status will be awarded with "HOLDr" points.
- ETH addresses start with "0" (zero) "HOLDr" points.
- Each month that an ETH address maintains a "HOLDr" account status, it will be rewarded with 1 "HOLDr" point.
- If in any month, an "OUT" transaction is made, the "HOLDr" points will be reset to "0".
- MTC "IN" transactions are allowed and will not remove the HOLDr account status or accumulated "HOLDr" points.
- The "HOLDr" points balance will represent a percentage ("HOLDr percentage") to be used in the airdrop calculations.
- The amount of MTC that the ETH address has at the moment of the snapshot will be incremented by the "HOLDr percentage", leaving us with the "HOLDr balance" that will be used in the calculations of the airdrop for that account.
- For example, if you held or increment your balance for three consecutive months, you will have 3 "HOLDr" points and your "HOLDr balance" will be 3% more from your actual MTC balance.
- If an ETH address does not receive a "HOLDr" account status, its MTC balance and "HOLDr balance" will remain the same.
- All "Holdr balances" will be added up to bring a "Total HOLDr MTC balance", and an "address participation" percentage will be determined by the relation between the "Total HOLDr MTC balance" and the current "HOLDr balance" for the address.
- The monthly total airdrop amount (4,765,355 MTC) will be distributed among all registered addresses based on their "address participation" percentage.
- Airdrops will take place on the following days after the monthly snapshot is taken and all calculations are done.

- The amount of MTC to be considered for the monthly airdrop will be 4,765,355 MTC.
- Any Ethereum (soft or hard) wallet where you are the owner and are responsible of the private key can be registered for airdrop distribution.

Docademic is not responsible for any MTC loss on addresses that do not allow for whatever reason the MTC to be moved or taken out.

Our monthly snapshots and airdrops are final.

Docademic reserves the right to change this rules on the future pursuing the best benefit for every MTC Owner.

Example (all amounts are only for reference)

Airdrop to be distributed: 1000

MTC Registered Owner	MTC Balance	Holdr Status (points)			Multiplier	MTC Holdr Balance	% Participation VS MTC Holdr Balance	Airdrop
		Month 1	Month 2	Month 3				
A	10000	1	1	1	1.03	10300	17.0%	169.966996699670
B	10000	1	0	0	1.00	10000	16.5%	165.016501650165
C	10000	0	0	1	1.01	10100	16.7%	166.666666666667
D	10000	0	0	0	1.00	10000	16.5%	165.016501650165
E	10000	0	1	1	1.02	10200	16.8%	168.316831683168
F	10000	0	1	0	1.00	10000	16.5%	165.016501650165
Totals						60600		1000
